THE REPLY FILED 04 November 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
<ol> <li>A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.</li> </ol>

(d) they present additional claims without canceling a corresponding number of finally rejected claims.		
NOTE:

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 5. does NOT place the application in condition for allowance because: i) Of the reasons set for the in the final rejection, i Applicants' argument that Mazed is silent with regard to multiple passes where each pass is offset such that no two passes write along th same path has been addressed in argument A of the final rejection, and iii) Applicants' argue that the application states "one technique fo maximizing averaging effect is to purposely shift each pass by some vary small distance or offset such that no two passes write along the same path" and that Mazed suggests no such offset. See argument A, and Mazed teaches multiple passes that are offset (see figure 3C references 130a-1, 130a-2, etc). Additionally, in regards to the statement from the application, although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims.
